

Console Diamond

Quick User Guide

How to play

Choose a game, join the players and watch the central ring: it is the console display. It shows timers, waiting phases, errors, winners and scores.

Controls

WHITE = previous

BLUE = next

GREEN = join

RED = back

1. Select >

In the menu, the ring changes effect for each game. Use WHITE and BLUE to scroll.

2. Enter +

Press GREEN: the join screen opens and your controller enters the match.

3. Join +

Other players press GREEN. Their ring sector lights up in their controller color.

4. Go! !

When everyone is ready, all players hold any button for about 1 second.

The Games

Up to 4 players: quick challenges of reflexes, memory and speed.

Racing

Race-start lights: wait for the ring to turn off, then press before the others. Press too early and it is a foul.

Colors

A color appears: press the matching button as fast as possible. One choice only: if you miss, you are out of the round.

Music

Listen to the four sample sounds, then recognize the mystery melody and press the correct color.

Memory

Repeat the sequence as it grows each turn. If you make a mistake or time runs out, the others score.

Score

The 5 LEDs on your controller are your points. First to 5 wins. Each point lights up in your controller color.
